- Integral channel drain
- Choice of cubicles or common tray design
- Standard 50mm shower waste supplied
- Optional security (anti-ligature) waste outlet

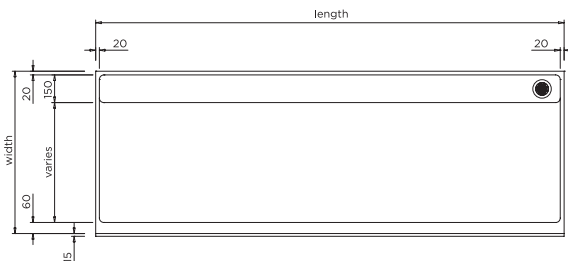

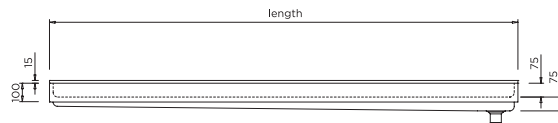

BSBM-MC: Multiple Cubicle Tray

INSTALLATION NOTES

- 1) Ensure access is available below shower base to connect 50mm waste to trap.
- 2) Alternatively the waste may drop into a (≈ 65 mm) sewer pipe riser with pre-existing trap below.
- 3) A pliable mortar bed (slurry) is recommended to support shower tray and prevent flexing.
- 4) Tile edges are supplied to three sides as standard for securing to adjacent walls and sheeting over.
- 5) Tile edge details can be customised where requested.
- 6) Front skirt is supplied standard but can be supplied without by request if unit is being recessed into floor.
