INSTALLATION NOTES

1) Shower column is secured to ground via mounting plate integrated into the base of the column. Refer to drawing for sizes and positions of fixing points. 2) Water inlets enter column via opening in base of column. 3) Water connection to timed flow tap is via a 1/2" flexible connector (supplied). 4) Water pressure to 1/2" connector: Min=300kPa, Max=500kPa. 5) Water connections for tapware can be accessed by removing an access panel in the column. 6) An additional removable panel is integrated into the top of the column to provide access to shower heads.
