A Message From Our Director

Innovating Since 1938

BRITEX has been a part of our Risstrom Family for over two generations and with a strong focus on innovation, development, investment and sustainability our business continues to grow and bring new and exciting products and services to our customers. This is achieved through strong specification and working closely with projects from design through to implementation and installation.

Our commitment to manufacturing in Australia has never been stronger with constant investment in new machinery, plant and equipment and extensive and more environmentally efficient renovations to our manufacturing headquarters at Head Office in Bundoora, Melbourne.

In following in Dad's footsteps, we have continued many of his passions by maintaining a focus on employing and giving apprentices every opportunity to join our company. Working with local secondary schools and industry training groups we offer both regular and trial work experiences opportunities to students enabling them to enjoy the experience of the Sheet Metal industry.

It's an honour to be part of the BRITEX community - a business that finds success through our amazing, loyal and hardworking staff. As Directors, we're proud to lead such a fantastic Australian family business.

CAM RISSTROM
MANAGING DIRECTOR

The BRITEX Advantage

Mission Statement:

To continually strive for the innovation of products and high quality service that customers recommend, specifiers prefer and employees are proud of.

Company Values:

Family Owned

Britex is Australia's premier manufacturer and supplier of stainless steel products for commercial building projects.

Proudly Australian owned and operated, Britex is consistently sought out by specifiers for stainless steel products due to a long, enviable history of providing the design industry with a vast range of world - class stainless steel products and a focus on providing unparalleled service to specifiers and contractors alike.

Whilst Britex boasts well over 83 years of operational experience, we are constantly evolving from implementing new industrial design software in our product development and documentation area, to adopting new packing procedures in the product dispatch department, every stage of the product realisation process is constantly reviewed to seek better outcomes for Britex customers.

Today we offer an extensive range of premium quality products that can be fabricated to customised specifications for individual projects.

Core product ranges include stainless steel basins, toilets, urinals, laboratory sinks, kitchen sinks, cisterns, troughs, drinking fountains, waterless urinals, benches, shelves, shower bases and more.

Australian Made

The use of high quality fixtures is critical to the success of any commercial project. With this in mind, Britex products are designed and locally custom manufactured to a standard that ensures specifiers can select our fixtures in the knowledge that they are choosing the finest stainless steel products available - fixtures that will contribute to an overall outcome of excellence.

In many respects, Britex design, quality and development endeavours are most evident in features incorporated into various Britex products - features that fabricators generally avoid trying to replicate due to the difficulties posed in executing them with the same precision Britex achieves, or due to the cost that is involved.

It's our holistic approach to achieving excellence that makes Britex the ideal choice when specifying specialised stainless products. From our literature to our finished product, Britex focuses on quality outcomes that are expected by architects, engineers and interior designers.

Britex sales and technical staff are true specialists in stainless steel and offer a wealth of experience to specifiers in designing and selecting stainless fixtures that are best suited to each and every individual project.

Projects

Public Amenities

Britex products are vandal resistant, low-maintenance, water efficient, robust, hard wearing, easy to maintain and can be found all over Australia in sports stadiums, entertainment venues, pubs, clubs, train stations and public toilet blocks.

Education

Education products are generally vandal resistant, functional, hard wearing, easy to maintain and incorporate numerous unique safety features.

Hospitality

Restaurant to kitchens to night club bathrooms, Britex offers an extensive range of premium standard or custom fabricated stainless steel fixtures to suit hospitality projects.

Health Science

Designed to meet the strictest guidelines set out by Health professionals Britex specially designed benches, troughs, basins, flushing sinks and waste disposal fixtures are consistently specified in hospitals, research institutes and medical facilities.

Accessible

Britex accessible fixtures conform to AS1428 and are highly resistant to vandalism, hygienic, robust yet stylish, making them perfect for use in inclusive shopping centres, clubs, schools, airports, and other public areas.

Security

Highly vandal resistant and anti-ligature, common features of security fixtures include fully enclosed plumbing connections, one piece or entirely welded constructions and low profile tapware options.

BRITEX Global

Britex is one of the world's most respected fabricators of premium quality stainless steel products.

From humble beginnings in the northern suburbs of Melbourne, Australia, The BRITEX Group has grown both nationally to all parts of Australia with multiple interstate offices and warehouses, and internationally with our own BRITEX staffed offices in the USA and China.

This supported by exclusive appointed agents for a range of areas and countries which help the BRITEX brand continue to grow and strengthen around the world.

With a distribution network that now extends to all parts of the globe, the Britex name is internationally recognised and synonymous with specialised stainless solutions that are reliable and befitting of world class facilities.
