WELS REG # T32620

TW-KWK Knee Wand Kit

Supplied as a complete kit suitable for retrofitting to basin (not supplied). Water flow is activated by applying pressure (normally with the user's thigh) to the wand, disengaging the wand from its neutral position. This will activate a timed flow of approx. 15 seconds. To keep water flowing, the user simply keeps the wand disengaged from neutral position by maintaining pressure with thigh. Kit includes: knee wand valve, breech piece, isolating valves, flexi connectors and goose neck spout. 15mm male BSP Inlet and Outlet. Temperature: 0-60°C. Pressures: Max = 350kPa, Min = 50kPa
