- Option for permanently sealed access panels (maximum security projects)
- Suits detention facilities and public amenities

about

The BRITEX Stainless Steel Accessible Security Toilet Suite with Integrated Backrest & Seat is a robust yet stylish compact suite that incorporates a vandal resistant toilet pan and dual flush cistern case. Additional integrated backrest allows the unit to be contraband proof. This suite is designed with an integrated backrest and seat for accessible users in correctional and detention facilities or applications requiring vandal proof fixtures. A pressed internal bowl area with safety radius front edges and unique trap design makes the pan durable and extremely water efficient. Being close-coupled, the suite is hygienic, highly resistant to vandalism and allows for ease of cleaning.

SECURITY ACCESSIBLE TOILET SUITE WITH INTEGRATED BACKREST SEAT

STD

HOW TO SPECIFY: Security Accessible Toilet with Integrated Backrest

STD (Base)
No Flushing

Base model. This model is selected when there is an existing flushing system in place that will connect to the unit or should the client have a flushing system of their own that they wish to adapt.

STD-E (Electronic)
Electronic Piezo Flushing

Electronic Piezo Flushing at top section of the toilet. Half flush and full flush etching is provided as well as blue rings to meet the luminance contrast. Flush capacity is configurable and are adjustable.

STD-M (Mechanical)
Mechanical Internal Cistern

This unit has a mechanical internal cistern complete with AS1428 Compliant Chrome Plated Half flush/ Full flush Metal Mechanical Button(s). The cistern and all other components are housed within the confines of the unit. This unit is typically selected when a rear service void is not available.

STD-FIW (Pneumatic)
Separate In Wall Cistern

This unit is supplied with a separate In Wall cistern that would typically be located in the rear service void. The single Chrome Plated Metal activation button can either be raised or low profile to suit application. An air hose will then run back through the wall and connect to the cistern located in the rear service void.

MODEL STD Side Elevation, Front Elevation, Rear Elevation and Plan
